

Amendments To Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1. (Currently Amended) A computer program product comprising a tangible computer usable medium having computer executable instructions recorded thereon that, when executed by a computer, cause the computer to perform operations comprising:

~~instructions to receive~~ receiving a submitted first account application of a customer, including a plurality of fields associated with personal identification and financial information;

~~instructions to automatically determine~~ determining, based on an identification of an existing account of the customer in the fields of the first account application, that the customer is an existing account holder;

~~instructions to transmit~~ transmitting a second account application to the customer, based on determining that the customer is an existing account holder, the second account application including a fewer number of the fields for entering the personal identification and financial information than the first account application,

wherein information entered by the customer in the fields of the first account application prior to the automatically determining is ~~automatically~~ transferred to corresponding fields in the second account application prior to the transmitting, wherein the transferring is performed by an automated process without requiring input by the customer;

~~instructions to receive~~ receiving a submitted second account application from the customer; and

~~instructions to approve or deny~~ approving or denying the submitted second account application based on the information on the submitted second account application and retrieved stored information associated with the ~~existing~~ customer.

2. (Previously Presented) The computer program product of claim 1, wherein the plurality of fields in the first account application comprise at least one of:

a customer name field, a customer address field, a field for entering at least a portion of a government identification number of the customer, a field for entering financial account information of the customer, a field for entering employment information of the customer, or a field for entering an annual income of the customer.

3. (Currently Amended) The computer program product of claim 2, wherein the instructions to automatically ~~determine~~ determining comprise:

receiving information for an existing account in the field for entering financial account information in the first account application;

validating the information for the existing account; and

transmitting the second account application after said the validating.

4. (Previously Presented) The computer program product of claim 1, wherein the second account application comprises at least one of:

a customer name field, a field for entering at least a portion of a government identification number of the customer, a field for entering an account number of an existing account of the customer, or a field for entering a confirmation number associated with the existing account.

5. (Currently Amended) The computer program product of claim 4, wherein the existing account comprises an existing ~~credit transaction~~ account and the confirmation number associated with the existing account comprises a ~~credit transaction~~ card identification (CD) number.

6. (Previously Presented) The computer program product of claim 1, wherein the second account application comprises at least one field that is not in the first account application.

7. (Previously Presented) The computer program product of claim 1, wherein the second account application comprises at least one of the plurality of fields of the first account application.

8. (Previously Presented) The computer program product of claim 7, wherein the first account application and the second account application comprise a customer name field.

Claim 9 (Cancelled).

10. (Currently Amended) The computer program product of claim 1, further comprising:
~~instructions to receive~~ receiving information from the customer for each of the fields of the second account application;
~~instructions to validate~~ validating the information received from the customer against data stored for an existing account of the customer;
~~instructions to retrieve~~ retrieving information required for the first account application from data stored for the existing account; and
~~instructions to process~~ processing the second account application based on the retrieved information.
11. (Currently Amended) The computer program product of claim 10, wherein the ~~instructions to approve or deny~~ approving or denying the submitted second account application is based on said ~~instructions to process~~ the processing.
12. (Currently Amended) The computer program product of claim 10, further comprising:
~~instructions to transmit~~ transmitting the retrieved information to the customer for confirmation.
13. (Currently Amended) The computer program product of claim 12, further comprising:
~~instructions to receive~~ receiving, from the customer, one of a confirmation and a correction for the retrieved information.
14. (Previously Presented) The computer program product of claim 1, wherein the first account application comprises a selectable indication that the customer has an existing account with the financial institution.
15. (Currently Amended) The computer program product of claim 14, further comprising:
~~instructions to receive~~ receiving a selection of the selectable indicator from the customer.
16. (Previously Presented) The computer program product of claim 14, wherein the selectable indication comprises at least one of a checkbox and a hyperlink.

Claim 17 (Cancelled).

18. (Previously Presented) The computer program product of claim 2, wherein the government identification number comprises a social security number of the customer.

19. (Previously Presented) The computer program product of claim 1, wherein the instruction to receive the submitted second account application does not utilize a customer login identifier.

20. (Currently Amended) A method, comprising:

receiving, using at a processing device, a submitted ~~first~~ account application of a customer, a first account application including a plurality of fields associated with personal identification and financial information, ~~the a~~ first account application further including a selectable indicator for selection when the customer has an existing account with a financial institution;

automatically determining, ~~using by~~ the processing device, that there is an indication that the customer is an existing account holder based on a selection of the selectable indicator associated with the first account application;

transmitting, using from the processing device, a second account application to the customer, based on determining that there is an indication that the customer is an existing account holder, the second account application including a fewer number of the fields for entering the personal identification and financial information than the first account application,

wherein information entered by the customer in the fields of the first account application prior to the automatically determining is ~~automatically~~ transferred to corresponding fields in the second account application prior to the transmitting, wherein the transferring is performed by an automated process without requiring input by the customer;

receiving, using at the processing device, a submitted second account application from the customer; and

approving or denying, using by the processing device, the submitted second account application based on the information on the submitted second account application and retrieved stored information associated with the existing customer.

21. (Previously Presented) The method of claim 20, further comprising:
receiving information from the customer for each of the fields of the second account application, the information including an identification of the existing account;
validating the information received from the customer against data stored for the existing account;
retrieving additional information required for the first account application from data stored for the existing account; and
processing the second account application based on the retrieved additional information.
22. (Previously Presented) The method of claim 20, further comprising:
receiving information from the customer in the first account application; and
transferring the information from the first account application to the second account application for at least one field that is provided in both the first account application and the second account application.
23. (Currently Amended) A method, comprising:
receiving, using at a processing device, a submitted first account application of a customer, including a plurality of fields associated with personal identification and financial information, the first account application further comprising a selectable indicator for selection by customers having an existing account with a financial institution;
automatically determining, using by the processing device, that there is an indication that the customer is an existing account holder based on a selection of the selectable indicator associated with the first account application;
transmitting, using from the processing device, a second account application to the customer, based on determining that there is an indication that the customer is an existing account holder, the second account application including a fewer number of the fields for entering the personal identification and financial information than the first account application.,
wherein information entered by the customer in the fields of the first account application prior to the automatically determining is ~~automatically~~ transferred to corresponding fields in the second account application prior to the transmitting, wherein the transferring is performed by an automated process without requiring input by the customer;

transferring, using by the processing device, any data entered by the customer in the first account application to a similar field of the second account application;

receiving, using at the processing device, remaining information of the customer for the second account application;

retrieving, using by the processing device, information stored for the existing account to process the second account application; and

approving or denying, using by the processing device, the submitted second account application based on the information on the submitted second account application and retrieved stored information associated with the existing customer.

24. (Currently Amended) A method, comprising:

automatically determining, using by the processing device, that a customer has entered an identification of an existing account in a first account application;

~~automatically~~ transmitting, using by the processing device and without further input from the customer, a second account application to the customer, the second account application including a fewer number of the fields for entering the personal identification and financial information than the first account application,

wherein information entered by the customer in fields in the first application prior to the automatically determining is ~~automatically~~ transferred to corresponding fields in the second application prior to the transmitting, wherein the transferring is performed by an automated process without requiring input by the customer;

receiving, using by the processing device, a submitted second account application of the customer; and

approving or denying, using by the processing device, the submitted second account application based on the information on the submitted second account application and retrieved stored information associated with the existing customer.

Claims 25 – 26 (Cancelled).
